I'm curious, what exactly did you see as an improvement from the URL? ~~~ bgentry I didn't see any, since Twitter added pages. However, I only use the lite client on my iPhone, so maybe my brain simply didn't realize the differences were there. ----- zerocrates Clickbait title, even for HN standards. No mention of what is actually new, just a link to the doc and a "now" timeline. ----- rodionos Very interesting! I just updated my twitter client on the web. ----- \_pmf\_ It's a bootstrap web app. On Friday, the Internal Revenue Service (IRS) illegally issued new regulations that severely restrict Americans' right to freely transfer their property to their kids for little or no consideration without triggering income-tax obligations on their estate. Such restrictions would also have the effect of stifling the general economy by putting a cap on the minimum degree of wealth one can have before one is required to pay taxes in perpetuity. Conservatives have been pushing for these restrictions for years. They were first mooted in the early 1990s by a thirty-four-year-old Treasury Department analyst named Thomas

Lawlor. In a 1993 paper, Lawlor stated that he believed the "prudent" and "more economically efficient" way for the government to deal with inheritance is "through the imposition of a minimum estate tax." As he put it, "Death taxes should be imposed on estates that are too small and not on those that are too large." Lawlor's views were eventually adopted by George W. Bush and members of the Republican House of Representatives. But they were quickly turned on their head by the Clinton administration, which seemed to change its mind as a matter of policy. When the Clinton Treasury Department announced its new regulation in 1995, it made Lawlor—and his ideas—look like geniuses. The new rule stipulated that if you died without having transferred any of your property to your heirs, then when you're dead, you would owe taxes
